

Dear FCC - please DO NOT weaken the New jersey Do Not Call Law - it is the only law that protects the pivacy and time that I have with my children and family. no one should be allowed to call me unless I want them to; and this law provides choice - choice is good. We get enough intrusion by advertisements, etc, from all the companies of the world, they positively should not be also allowed to directly interefere in my life through the telephone. and while I am commenting on telephone issues, my cell phone number should positively not be listed on any directory anywhere in the world - I have to pay for all airtime I use including calls to me - I should not have to pay for calls I do not wish to receive because my number is on some public directory. Thank you for protecting NJ
